### *In the Claims*

Please amend the claims as follows:

 Sub  
DI

1. (Amended) A receiving apparatus, comprising:
  - [a] receiving means for receiving an electronic mail transmitted through a network;
  - [a] first extracting means for extracting encrypted certification information inserted in said electronic mail received by said receiving means;
  - [a] second extracting means for extracting a control command inserted in said electronic mail received by said receiving means for controlling a predetermined electric device, wherein said control command is selected by a user of said predetermined electric device and indicates a manner in which said predetermined electric device will operate after said predetermined electric device is activated;
  - [a] decrypting means for decrypting said certification information extracted by said first extracting means;
